

SmartZero™

status quo *Dial in your ROI* game changer

Encinitas Civic Center.
EPA Energy Star. LEED Silver EBOM
AEE International Project of the Year.

Save Big with Smart Zero

Zero Cost. Zero Risk.

3fficient experts work with building owners and CFOs to engineer optimal utility, maintenance, tax and other cost savings for reinvestment back into their facilities - making them more efficient, productive and sustainable.

No up-front costs. Paid from savings.

Claim your Savings Now

Big Impact "SmartZero™ changed my whole business - for the better".

Corporate

"You saved us \$200,000/yr. With our modest pre-tax profit margin, that's the same as generating over \$4,000,000 in new revenue every year! That also increases our company valuation by \$1,000,000. Great Job!" - confidential Corporate CFO

Education

"This project has not only made our buildings more comfortable, the learning experience has improved dramatically and allows us to illustrate renewable energy, energy efficiency and energy management first hand." - Dr. Jean Lecuyer, GCCD

Government

"We were really pleased how 3fficient educated us about energy efficiency, explored many options, came up with great "out of the box" solutions, and then walked us through the whole process." - Larry Watt, Encinitas

Healthcare

"You guys sure turned our master planning upside down (in a positive way). It looks like we'll be a lot more efficient and provide service much more reliably than we have in the past and save more money than each year before." - Mark Swanson, AHC

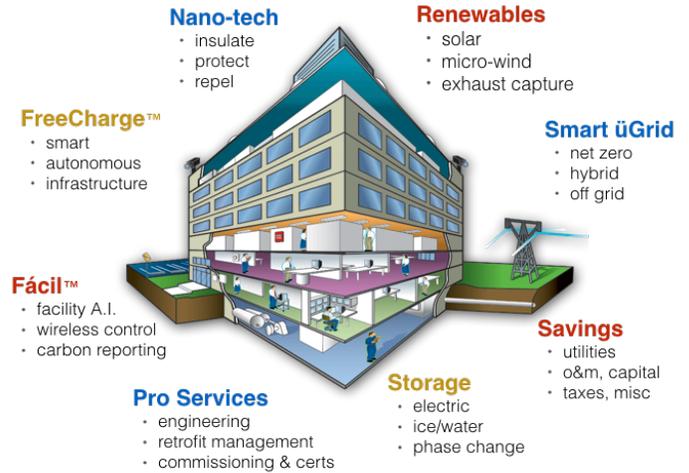

Customer Centric Results

3fficient has already saved its customers over \$1 Billion in utility savings.
And we're just getting started.

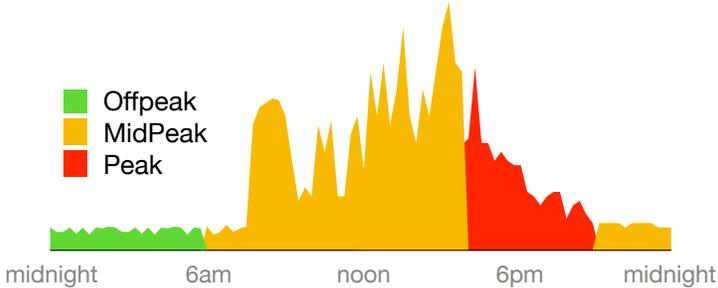

Engineered Savings

For 25 years, 3fficient has been a leading integrator of clean technologies that make business better. Our **integrated systems approach** and experience enables us to find exceptional sustainable savings for our clients while decarbonizing the built environment.

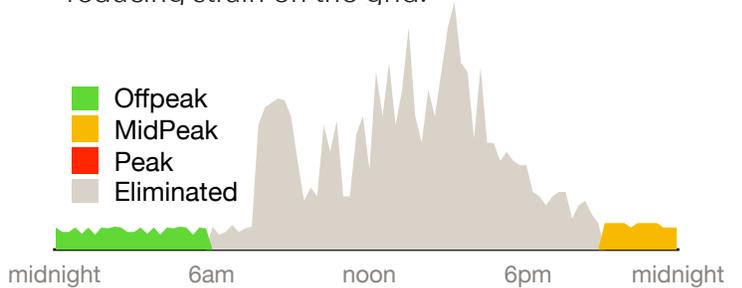

Utility Bill Before SmartZero

For example, most electric utilities charge a BIG premium for power during "peak" use times. That 1-minute spike can set your rate through the roof - all month or all year!

Utility Bill After SmartZero

3fficient's SmartZero intelligent energy solutions sustainably eliminate high energy costs while providing critical backup and reducing strain on the grid.

Delivering Lifecycle Value from Origination through Operation
